OPTICAL SENSOR DISSOLVED  
OXYGEN + TEMPERATURE

OPTICAL SENSOR SALINITY

OPTICAL SENSOR TURBIDITY

## OPTICAL SENSOR CHLOROPHYLL

# SMART WATER MONITORING

Smart Water was designed for the online monitoring and measuring of the main environmental parameters, which are fundamental for producers today. It has RF communication systems with ranges longer than 10 Km. Its optical measuring sensors have been exhaustively chosen and selected to give maximum fidelity on readings to our clients. We have dissolved oxygen, temperature, salinity, turbidity, chlorophyll and other sensors.
